## Adventure class yachts are for outdoor enthusiasts who see the destination as just the beginning.

Trekker's adventure class yachts are inspired by Jacques Cousteau and his famous Calypso. Trekker's distinctive profiles carry an unprecedented array of auxiliary craft, enabling a multitude of adventures to be conducted directly from the yacht.

Trekkers incorporate a powerful Launch and Retrieval System (LRS) that makes it easy to lower the toys directly off the swim step and just outside the garage where accessories can be loaded and unloaded, even in a slip or berth. Endless combinations of adventure craft are possible, enabling owners to custom tailor their selections for sailing, fishing, skiing, scuba diving, paddling, surfing, flying and even submarines.

Trekkers are setting the industry's highest environmental standards with burnished aluminum exteriors, a choice of two luxury interiors incorporating environmentally friendly materials, and ultra-efficient hull designs and propulsion systems that increase range and fuel mileage while reducing emissions.

Trekker innovations also include a transparent all-weather Command Control Center for unmatched visibility; 1-piece marine grade aluminum construction for unparalleled strength, safety, and low maintenance requirements; a Roto-Dock™ swim step that opens to provide dual platforms for recreation and docking several adventure craft, and a choice of two world class interiors that emphasize comfort and warmth with innovative ultra-sport designs.

Ranging from 65 to 120 feet and beyond, Trekker's semi-custom platform is made for today's active lifestyles, whether the adventures are a series of weekend getaways or an endless voyage around the globe.

**Trekker's mission is to produce premium yachts that deliver the highest levels of both adventure and environmental responsibility.**
